

## 1. Please introduce yourself or take me through your resume.

Answer: My name is Routh. Kiran babu from Odisha, I have completed my Engineering in Electronics and communication from Centurion University of Technology and Management. Masai School has given me a Amazing opportunity to have career in tech which led me have a Software testing profession. Where I have a hands-on experience on javascript, manual testing, automation testing using cypress, programming related to python and java. This time I am at a learning stage on Learning Selenium using java Programming and Eclipse, Fundamentals of Pattern printing and good foundation on basics programming skills.

My Interests are learning something new, doing physical workout for improving mental toughness, taking care about health.

## 2. We don't hire non-B.techs for this role. (If applicable)

Answer: Yes, I appreciate your concern about hiring B.tech graduates. What I believe is delivery of results truly matters. I have gained the hands-on experience on software testing profession and since my curiosity and Passion toward this field of testing remained constant for months this leads to have a confident that I can exceed expectations in this role.

## 3. We don't hire freshers. (If applicable)

Answer: I may not have a enough experience as the experience professional candidates does. My overall development over the last few months changed me entirely by adapting to the new skills in software testing, makes a competitive candidate, and since I have eagerness to learn something new and staying on work for long time makes a difference. I will work hard for overall development of your team and collaborative phase.

## 4. Why did you join Masai School?

Answer: I joined Masai School because to improve necessary skills to become a professional software tester(SDE-QA) and finally land in the tech industry. And me being in this field should not give bad impression to this school as much as possible. Without Doing any cheat code to success and using both mind and body to complete the task given improves not only to land on tech but overall personality to stay committed.

## 5. Why do you want to join our company?

Answer: As a Software tester, I am thrilled to Work for your company because the work you do in past years on project that reduces human effort has inspired and motivated me to contribute to your team with my hand-on experience and skills.

## 6. What do you know about our company?

Answer: Your company opens the opportunities for the testers like me to have visionary path that ensure the best quality of the software and way your company hire improves the interest in this field.

## 7. Why should we hire you? Or How do you think you can be an asset to the organization?

Answer: As a fresher in software tester has come across different skill that have built and have a good grip on it makes a strong candidate over experienced professionals who has years of experience on different industry. I came up with fresh mindset and fast learning and adapting to different skills makes me a competitive candidate over other freshers. I work harder to have a better team collaboration so that I can deliver my knowledge to others during the journey to finish the project in time. And keep a note on things to improve and new features to add so the overall project is successful.

## 8. What are your career objectives? Or Where do you see yourself in the next 3-5 years?

Answer: During upcoming 3-5 years: I want to see myself as a professional learner on the Software tester and able to have good health with time management skill over different fields like gym work, company work, family and relatives, health care etc.

## 9. What are your strengths and weaknesses?

Answer: One of the key strengths is attention to details as a software tester, problem solver as a programmer leads to critical thinker in real life, adaptability to mental toughness to stay motivated to keep on learning for long hours using physical workout as interval.

My weakness phase contains Sometimes need to revise the things learned in previous months using notebooks make lead to delay in learning new things. Physical workout

improves work life balance, decision making, etc which leads to be a athlete which is not my professional career.

## 10. Let's say you are delayed on a deadline, how would you manage it? (Answer this question using the STAR Method).

Answer: Thanks for asking this question. Assume this happens during preparation for the project submission. Each of the candidate has different responsibility at different slot of time. S for different situation: First need to make a bring things/tools/apparatus required. At this situation one candidate brings hardware/Software requirement, Other ensure how the product must look at the end, Other validates whether this information is correct or not. This distribution of work is about the task of each candidate at the initial stage. While doing the connection of circuits as a situation, different candidate will change there responsibility as other first person does soldering, Other connects the circuit, Other checks everyone and provides things they ask, its actually the beauty of team work and action they take. If the check in each situation passes at the end/Result more is the success rate at end.

## 11. What is your Salary expectation?

Answer: Based on my skills, and engagement in your company It's better my salary is normally around 2-3 lakhs at the start. Moreover, I am fully encourage myself to be get hired in your company and collaborate with your team rather than getting free money.

## 12. Are you open to relocation? What are your location preferences?

Answer: Yes I am open to relocation provided by your company. Which leads to flexibility and engaging to new challenges like adaptability and be happy to interact with different culture and environment. I best preferred location are bangalore, Hyderabad, or pune. As a Software tester this be a best opportunities for collaborating with people around the professional workplaces.

## 13. Do you have any questions for us?

Answer: If I get Hired Please let me know what things I need to get learned, and what things I have to do. I will be waiting for your valuable feedback. Thank you very much.
