Hooks in WebdriverIO
     Before
   After
     beforeEach
     afterEach
Setting up autosuggestions
Automate a Hybrid application with WebdriverIO Context
Create a hooks.js in specs Folder in test Folder in
MOBILETEST

Script in hooks.js:

```
describe('Hooks', () => {
    before('before All Test', () => {
        console.log("Before hook")
    })
    beforeEach('before Each Test', () => {
        console.log("After hook")
    })
    it('test1', () => {
        console.log("test1")
    })
    it('test2', () => {
        console.log("test2")
    })
```

```
    it('test3', () => {
        console.log("test3")
    })
    it('test4', () => {
        console.log("test4")
    })
    after('after All Test', () => {
        console.log("After Hook")
    })
    afterEach('after Each Test', () => {
        console.log("AfterEach Hook")
    })
})
```
Run the command in gitBash in TERMINAL:
npx wdio run
.\C:\Users\TMA239\Desktop\mobileTest\wdio.conf.js
npx wdio run .\wdio.conf.js --spec .\test\specs\hooks.js
