HTML form Tags

`<textarea>`

Allows multi-line text input.

3. `<select>`

Used to create a drop-down list. The options within the list are defined using `<option>` elements.

4. `<button>`

A clickable button.

5. `<label>`

HTML form Attributes

- **name**: name of the form
- **method**: define form submission method i.e. **get** or **post**
- **action** : where to take form data after submission

Div Tag

The `<div>` tag defines a division or a section in an HTML document.

The `<div>` tag is used as a container for HTML elements - which is then styled with CSS or manipulated with JavaScript.

BLock VS Inline elements
